## SATELLITE GIS DATA WITH HIGH PRECISION

In 2015, our company began to develop technology for 3D map production. After two years, we can say: **we can produce 3D maps of any region of the world**, using cartographic companies and customer's data in combination with GIS terrain data from the satellite.

We offer **3D maps development and production** in formats from 10cm \* 6cm to 1.189m \* 841mm (A0).

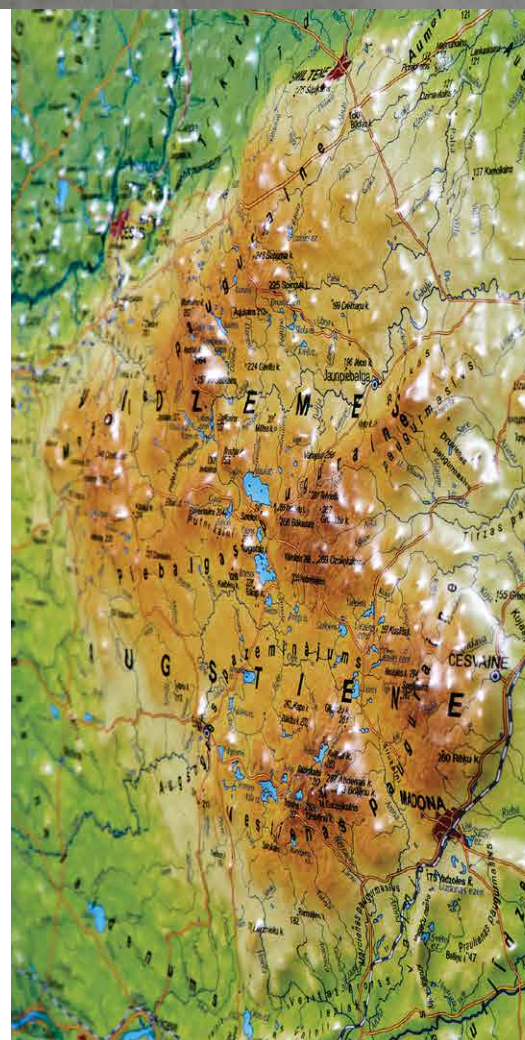

Equipment and technology are unique.

We have developed and manufactured the equipment.

**We do ourselves:** the whole process of file preparation, the mould design and milling for production, the printing process.

**We also produce:**

- educational visual aid materials in 3D format
- advertising stands up to A0 format with 3D effects
- Braille features
- Large format 3D packaging

**VACUUM FORMING IN COMBINATION WITH COLOR PRINTING IS USED FOR:**

**3D P.O.S. products:** voblers, posters, logos, sales tools, etc.

**3D PACKAGING:** printed blisters, boxes, etc.

**INDUSTRIAL FORMING:**

- enclosures for devices and equipment
- blister & correx packaging, etc.
